

Agentic Knowledge Graphs for Deterministic Code Generation

Engagement Structure

University Principal Investigator,
Professor and Researcher(s)

University

eBay Co-Investigator(s)

eBay VP/Head of Department

Grant Amount Requested

Objectives

What are you trying to do? What is the problem? Why is it useful / interesting? Why is it a good candidate for academic research rather than doing it in-house?

Previous Work

Describe any relevant previous project and/or publication. If this is the continuation of a project, show previous results (business impact if applicable).

Methodologies / Approaches

How is it done today, and what are the limits of current practice? What is new in your approach and why do you think it will be successful?

Impact

How does it relate to the problems eBay is trying to solve? If you are successful, what difference will it make? What applications are enabled as a result? What are the risks?

Expected Product / Output / Milestones

PoC models and algorithms, reports, publications, experiments, learnings... What are the midterm and final checks / metrics for success? How long is the work expected to take? Is there a possibility of tiered funding corresponding to progressive research outcomes?

University / Lab / Researcher Qualification

Who will be the university researchers eBay will engage with? Description of their work, links etc.
